PRECIOUS METAL REFINING FOR DENTAL PROFESSIONALS

MEMBERS OF

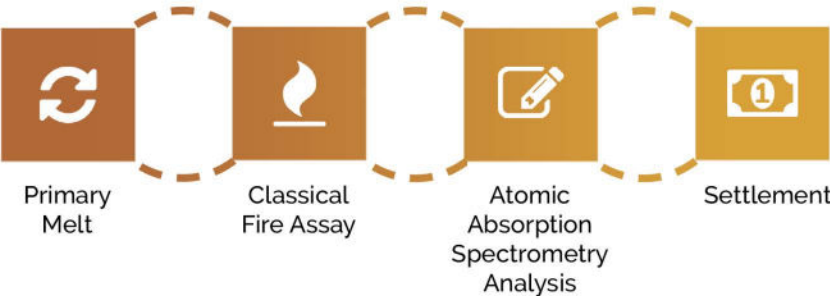

WHO WE ARE

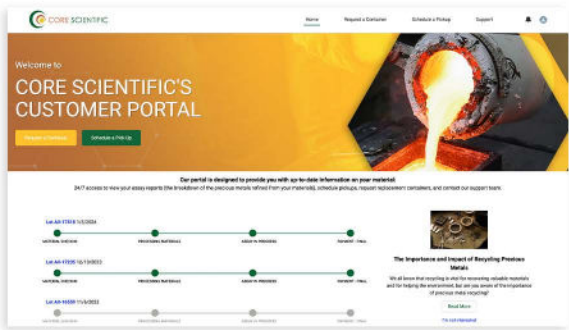

Core Scientific is committed to excellence in refining a wide range of precious metals like gold, silver, platinum, and palladium. As an industry leader, we bring our accurate refining process to dental offices and labs across North America, ensuring the highest standards in processing dental scrap.

Our superior refining techniques and assay technology eliminate all the guesswork and enable us to offer the most competitive payments in the industry. We are the only dental refiner offering a secure customer portal with 24/7 access to settlements and material details, ensuring a clear chain of custody for your metals.

OUR UNIQUE REFINING PROCESS

CLEAR CHAIN OF CUSTODY WITH OUR SECURE CUSTOMER PORTAL

- ✔ TRACK YOUR SHIPMENT
- ✔ RECEIVE MATERIAL UPDATES
- ✔ REVIEW HISTORICAL DATA

SELLING FOR CASH ON THE SPOT?

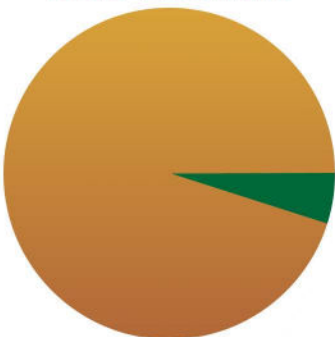

Buyers paying on the spot are **middlemen** who must re-sell your material to a direct refiner like Core Scientific, costing you up to **70% of the value**.

With Cash Buyer

Cash Buyer

Core-Scientific

Refinery

CORE SCIENTIFIC IS A DIRECT REFINER.
CUT OUT THE MIDDLEMAN AND **EARN 2-3 TIMES MORE!**

WHAT MAKES US DIFFERENT FROM OTHER DIRECT REFINERS

SUPERIOR SAMPLING AND ASSAY TECHNOLOGY

Our team brings 50 years of industry knowledge in smelting and assaying precious metals of various forms. We conduct all of our training in-house to maintain the highest standards in our refining processes. We use the following techniques to properly identify the true value of the metals: -Preliminary Xray, Fire Assay, Pin Tube Sample, Inductively Coupled Plasma (ICP), and Atomic Absorption Spectroscopy (AAS).

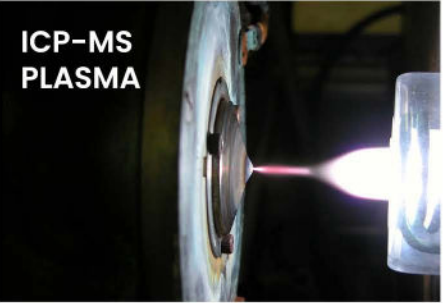

PIN TUBE SAMPLING

FIRE ASSAY

ATOMIC ABSORPTION

ICP-MS PLASMA

REPORTING CAPABILITIES

Core Scientific strives to provide reporting designed to meet the unique needs of your organization. **Our assay reports are the most detailed and transparent in the industry**, which you can access within your dedicated customer portal. We meticulously document the received weight, recovered amounts of gold, silver, platinum, and palladium in each melt, and the current metal market valuations.
